Safety Notice: Saver CF Emergency Escape Breathing Device – Insufficient Flow

Dear Sir/Madam

As part of Dräger's continuous product surveillance activities, and in our commitment to maintaining the high standards of quality expected of us, we are providing the following important safety information.

Draeger Safety UK Limited's quality monitoring and assurance program has identified a number of Saver CF emergency escape breathing devices which may supply an insufficient volume of air upon activation.

A reduction in airflow of this nature can lead to increased Carbon Dioxide (CO₂) build up within the hood, or negative pressure within the hood, making it more likely for contaminants to enter the hood.

To protect users, Draeger Safety UK Ltd recommends that the products affected within the below serial number range are immediately taken out of service where possible. If you have passed on or sold the product to a third party, please forward this information to them. Your local Dräger sales and service organization will arrange new, replacement units.

Affected serial number range: BSUD-0001 (April 2025) to BSUK-9999 (September 2025).

To best facilitate these replacements, please communicate any urgent requirements to your local Dräger entity and replacements will be prioritized accordingly.

The safety of our customers is of paramount importance to Draeger Safety UK Limited, and we would like to sincerely apologize for any inconvenience or difficulty this may cause.

With kind regards,

Amy Campbell
Head of PM Breathing Systems & Protective
Equipment

Neil Fairley
